ACC Clear™ Anti-Fog Coatings

Seal-Thru™ Anti-Fog Coatings for Flexible Packaging

ACC Clear™ Seal-Thru™ coatings provide an unobstructed clear view of packaged products by the eliminating formation of condensation droplets on the inside of your packaging. Our **ACC Clear™** topical coatings demonstrate unsurpassed, instant anti-fog properties compared to master batch additives; at a significantly lower cost! Our **ACC Clear™** technology also features built-in slip and anti-blocking properties necessary for efficient processing.

ACC-Clear™ Anti-Fog Coatings are supplied in both concentrate and pre-diluted forms, in 440lbs drums or 2200lb totes for easy handling and storage.

PRODUCT FEATURES:

- Versatile:** ACC Clear™ Anti-fog Coatings provide instant, long lasting anti-fog properties for Fresh-Cut Produce, Lidding Stock and other hot/cold foodservice applications. The coatings deliver proven anti-fog properties on a wide array of packaging films including OPP, PE, Co-Ex films, PLA, PET, and other multi-layer structures.
- Heat Sealable:** ACC Clear™ Anti-Fog Coatings are 100% heat sealable, eliminating the need to “pattern print” and register the anti-fog coating on press.
- FDA Compliant:** ACC Clear™ Anti-Fog Coatings offer full FDA compliance for direct food contact and under food additive regulations.
- Methods:** ACC Clear™ Anti-Fog Coatings can be applied Dip/Squeegee, Roller, Spray, Flexo or Rotogravure. Our ACC Clear™ coatings can be also modified to fit existing custom coating equipment.

Please contact your ACC Coatings representative for further information and detailed product recommendations for your application.
