ACC Clear™ Anti-Fog Coatings

Anti-Fog Coatings for Rigid Thermoformable Packaging

ACC Clear™ thermoformable coatings provide instant, long lasting Anti-Fog protection for unsurpassed product clarity. **ACC Clear™** thermoformable coatings are water-based formulations, which can be applied directly to flat sheet and are designed to withstand the heat and stretch of the thermoforming cycle. Our **ACC Clear™** technology also features slip, mold-release and de-nesting properties necessary for efficient processing.

ACC Clear™ Anti-Fog coatings are supplied in either 440lbs drums or 2200lb totes for easy handling and storage.

PRODUCT FEATURES:

- Versatile:** *ACC Clear™* Anti-Fog coatings provide instant, long lasting anti-fog protection for a variety of Hot & Cold Fill/Storage applications. *ACC Clear™* coatings deliver proven anti-fog properties for wide array of rigid substrates including APET, RPET, PP, OPS, HIPS, PLA and many others.
- Sealable:** *ACC Clear™* Anti-Fog coatings can be designed with seal-through technology, which allows formed parts to be used in conjunction with lidding films and labeling stock.
- FDA Compliant:** *ACC Clear™* Anti-Fog coatings offer full FDA compliance for direct food contact and under food additive regulations.
- Methods:** *ACC Clear™* Anti-Fog coatings can be applied via Dip/Squeegee, Roller, Spray, Flexo, or Rotogravure. Our *ACC Clear™* coatings can be also modified around existing coating equipment.

Please contact your ACC Coatings representative for further information and detailed product recommendations for your application.
